

As part of .CO Internet's commitment to protect certain intellectual property rights of brand owners, the Sunrise phase of the global launch plan for the .CO domain (conducted from April 1, 2010 to June 10, 2010) provided eligible trademark owners with the opportunity to register the domain names matching their marks before the general public. Many thousands of trademark owners took advantage of this opportunity and were awarded the .CO domain names for which they applied. In some cases, however, the applications submitted were deemed to be invalid by the .CO Registry's Validation Agent and, thus, the domain names were not awarded at the conclusion of Sunrise. The Validation Agent responsible for making these determinations was the global consulting firm Deloitte, in tandem with the Belgian law firm Laga – both world-renowned experts in the field.

As stated in the Launch & Registration Rules governing the allocation of .CO domain names, unless otherwise reserved or restricted, the domain names that were not allocated at the conclusion of Sunrise will be made available during subsequent phases of the .CO launch plan.

In an effort to add transparency to the allocation process, .CO Internet is publishing a list of the domain names that were applied for, but not awarded, at the conclusion of the Sunrise phase.

These domain names will be available as of Monday, July 12, 2010, at 2pm EDT (UTC -4).
